DETAILED ACTION

Allowable Subject Matter

1. Claims 1, 3-27, 39-42, 44-58, 60-80, 88-92, 94-120 and 122-125 are allowed.

The following is an examiner's statement of reasons for allowance:

- 1a. Regarding claim 1, prior art of record fails to disclose a search method for identifying one or more candidate delays for a receiver comprising: generating a hierarchical delay tree for the received signal comprising a plurality of delay nodes in a lowermost level of the delay tree linked by branches and one or more linking nodes to a root node at the highest level of the delay tree, wherein each delay node is associated with one of the signal delays; searching through the delay tree to identify one or more surviving delay nodes; and selecting one or more surviving delay nodes as the candidate delays, in combination with each and every other limitation of the claim.
- 1b. Claims 3-27 are allowed as being dependent on claim 1.
- 1c. Regarding claim 39, prior art of record fails to disclose a method for selecting one or more finger delays for a RAKE receiver comprising generating a hierarchical delay tree comprising a plurality of delay nodes in a lowermost level of the delay tree linked by branches and one or more linking nodes to a root node at the highest level of the delay tree, wherein each delay node is associated with a signal delay; searching through the delay tree to identify one or more surviving

delay nodes; adding the candidate delays corresponding to the surviving delay nodes to a candidate pool; and selecting one or more finger delays for the RAKE receiver from the candidate pool, in combination with each and every other limitation of the claim.

- 1d. Claims 40-42 and 44-57 are allowed as being dependent on claim 39.
- 1e. Regarding claim 58, prior art of record fails to disclose a delay searcher for a receiver to search a received signal having a plurality of signal images corresponding to a plurality of signal delays for one or more candidate delays, the delay searcher comprising: a tree generator to generate a hierarchical delay tree comprising: a plurality of delay nodes in a lowermost level of the delay tree, wherein each delay node is associated with a signal delay; a root node at the highest level of the delay tree; one or more linking nodes disposed between the root node and the plurality of delay nodes; and branches that link the plurality of delay nodes to the root node via the linking nodes; and a tree searcher to search through the delay tree to identify one or more surviving delay nodes, wherein the one or more surviving delay nodes correspond to the one or more candidate delays.
- 1f. Claims 60-80 are allowed as being dependent on claim 58.
- 1g. Regarding claim 88, prior art of record fails to disclose a RAKE receiver in a wireless network comprising: a delay searcher to generate and search through a hierarchical delay tree based on delay nodes associated with the signal delays to identify one or more surviving delay nodes, wherein each surviving delay node

corresponds to a candidate delay; and wherein the RAKE receiver selects one or more RAKE finger delays from the candidate delays, in combination with each and every other limitation of the claim.

- 1h. Claims 89-92 and 94-118 are allowed as being dependent on claim 88.
- 1i. Regarding claim 119, prior art of record fails to disclose a circuit for processing a received signal having one or more signal images, each signal image having a corresponding signal delay, the circuit comprising search circuitry to generate and search through a hierarchical delay tree based on delay nodes associated with the signal delays to identify one or more surviving delay nodes, wherein each surviving delay node corresponds to a candidate delay.
- 1j. Claims 120 and 122-125 are allowed as being dependent on claim 119.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
